

Thermodynamics And The Destruction Of Resources

thermodynamics quotes are famous The end chapter of Benjamin Gal-Or's 1974 Economics, and Policy , in: Thermodynamics and the Destruction of Resources
<http://www.eoht.info/page/Thermodynamics+quotes>

Endless movement between hot and cold will eventually mean the end of the universe Thermodynamics is the study of heat and energy. At its heart are laws that describe

<http://www.theguardian.com/science/2013/dec/01/what-is-the-second-law-of-thermodynamics>

In thermodynamics, entropy (usual symbol S) is a measure of the number of specific ways in which a thermodynamic system may be arranged, commonly understood as a

<https://en.m.wikipedia.org/wiki/Entropy>

This destruction is proportional to the entropy increase of the The thermodynamic value of a resource can be found by multiplying the exergy of the resource by
<http://en.wikipedia.org/wiki/Exergy>

References about rigorous thermodynamics. please see our policy on resource recommendation Why is Los Angeles targeted for destruction so often in Hollywood

<http://physics.stackexchange.com/questions/5614/references-about-rigorous-thermodynamics>

The first law of thermodynamics states that energy can be transferred or transformed, but cannot be created or destroyed.
